“LADY.”

LADY.

From a Photograph by C. Bodurtha.

SPRING AND FALL OF 1876.

—o—

TO CORRESPONDENTS.

The past season has not been generally favorable to grape-growing, so far as my experience and observation has extended, and in many localities the Hybrid grapes, and more tender native varieties have suffered more or less from mildew and rot, caused by sudden and extreme changes of temperature, and from frequent and excessive rains. The Concord and its seedlings, Martha, Lady, Eva, Worden's Seedling and Telegraph, have all stood very well, and ripened their fruit and wood, and held their foliage with very little injury in any way. The Delaware has suffered from the effects of mildew of the foliage, but has shown no disposition to rot. Among the Hybrid grapes, Senasqua has been one of the healthiest of all, both in fruit and foliage. Rogers' Hybrid grapes seem to retain their position generally in public estimation, though they fail in some places. Here, they have succeeded as well as any varieties, excepting the Concord and its kindred. The most reliable of Rogers' grapes are Massasoit, Wilder, Lindley, Agawam, Merrimack, Salem, and Nos. 5, 28, 30 and 33, not otherwise named. Of all these No. 3 or Massasoit, is the earliest, and No. 30 the finest in quality and flavor. No. 1 or Goethe, is valuable, and esteemed in some localities, but is quite late in ripening. Allen's White Hybrid, Maxatawny, and Rebecca, three old and well-known white varieties, still hold their own, and have an established reputation, for amateur and garden culture. Concord Chasselas, and Concord Muscat, in common with Hybrids generally, were the past season injured by both mildew and rot to some extent.

The vines offered, have been grown with special care, and when it was needed, with such protection as insured a perfectly healthy and vigorous growth with abundant, sound and healthy roots. The Concord vines will be found worthy the attention of large planters. Too much can hardly be said in praise of the new white Concord Seedling, "LADY," which must take the very first position as an *early* variety, both for health and hardiness, as well as for extreme earliness, beauty and superior quality. EVA, is also a most promising white grape, and well worthy of trial. Among new black grapes of the Concord character, Worden's Seedling is probably one of the most promising and desirable. Very fine and healthy plants, can be supplied of all these new kinds. All orders, whether large or small, will receive prompt and careful attention, and letters with remittances will be answered by return mail.

Plants, seeds and vines, in small lots, sent by mail, safely packed, to any part of the Union, or Canada. At single rates, they will be sent, postage-paid, on receipt of price. At dozen rates, 25 cts. per dozen will be added for packing and postage.

One dozen vines will be furnished at dozen rates in different varieties, not less than three of each kind. Or, 100 vines or more, at 100 rates, not less than 10 of each kind.

A small charge will be made to cover cost of boxes and packing, when vines are sent by freight or express—and when packages are sent C. O. D., the cost of return charges will be added, unless otherwise agreed. Money can be sent safely by post-office orders, drafts, or registered letters.

Write your address plainly, with town, county, and State.

DESCRIPTIVE LIST OF GRAPES.

The new, Extra-early White Grape,

"LADY."

Since the appearance of the Concord grape, which has become so universally popular, no new variety has appeared, so promising in all the qualities and characteristics necessary to render a grape valuable for the most universal and extensive cultivation, as the LADY. It has now been tested carefully for eight years, and has fruited continuously for that length of time, without a single failure, and has endured all the vicissitudes of our variable and uncertain climate without suffering either from winter-killing, rot, or mildew. When to this is added its fine size, attractive appearance, and really excellent quality, together with very early ripening, we have a combination of merits enjoyed by no other grape yet introduced to the American people. A really good, extra-early white grape, has long been wanted by grape-growers; for we have had, up to the present time, no popular grape of even fair quality that was very early in ripening. The Hartford Prolific, Ives, and one or two others of less note, have been tolerated as early market grapes, simply because they *were* early; and because nothing better was to be had in their season. The LADY grape just meets this want, and supplies a variety suited alike to the requirements of the market gardener, the amateur, the vinedresser, and indeed for every lover of the grape who desires *the best and earliest* grape, healthy, hardy and productive, and adapted to a larger section of country, than any variety yet known. Being a pure, native Concord seedling, and possessing all the best characteristics of its parent, in the way of perfect health and hardiness; ripening also from two to three weeks earlier than Concord, it is especially adapted to more northern regions where Concord does not ripen. Its period of maturity has been from the 10th to the 30th of August, according to the season. The Winter of 1874-5 was one of unusual severity, and many trees and vines usually considered hardy, were destroyed or seriously injured. Several LADY vines were purposely left fully exposed during the entire Winter, and I am glad to say, were wholly uninjured. The whole season was specially unfavorable for grape-growing; the Spring cold and backward, and the Summer unusually cool, with great excess of rain and cloudy weather. As a consequence, many varieties suffered from mildew and rot; but, as invariably heretofore, the LADY remained perfectly healthy, both in fruit and foliage. Owing to the unusual lateness of the season, it did not ripen as early as last year; but was relatively as far in advance of other varieties—fully *two weeks* earlier than Concord. I am more than ever, fully satisfied that this grape will succeed wherever any of our native grapes can be successfully grown; and that it is in no respect inferior in health and hardiness to its parent Concord, or to Ives, Hartford, or any of the "iron-clad" varieties, while in flavor and quality it is greatly superior to any of its class. No early grape yet before the public, approaches it in quality. I cannot better describe this grape, as grown here, than to repeat what was said of it last season. It is not a "hybrid," but a pure, native Concord seedling, and is in flavor much more pure and delicate than Concord, though in its texture and general character somewhat like it. Like the Concord, it bears heavily, without seeming to impair the vigor of the vine; is very sweet and rich, with just enough of sprightly, vinous acid to prevent cloying the appetite, and has met the highest praise from all who have tested it. In

color it is very attractive; skin thin and wholly without coarseness; pulp tender, and of equal consistence throughout; hangs firmly to the bunch, never dropping prematurely like the Hartford.

In short, I offer it as *the very best white grape, for universal cultivation*, both for the amateur, the vineyardist, and the market gardener, yet introduced. It is *the grape for everybody to plant—easily grown, adapted to all grape-growing localities, and every way reliable.*

The following are a few of the many favorable opinions of the Lady grape which I have received from the most distinguished and well-known horticulturists in the country:

THOMAS MEEHAN, editor of the *Gardener's Monthly*, says of it: "*The flavor of the fruit was equal to any we have ever tasted.*"

The horticultural editor of the *Albany, N. Y., Country Gentleman* thus acknowledges the receipt of a specimen of the "LADY" sent in August, 1874: "The clusters sent reached us in good order. They are of medium size, berries large and close; the pulp somewhat hard and the flavor characteristic of the Concord origin, but the skin is thin, and there is a peculiar sweetness in the taste left after eating a well-ripened specimen. Its character, combined with the early period of ripening mentioned by our correspondent, give it every appearance of being, as he says, a very valuable acquisition."

A. M. PURDY, editor of the *Small-fruit Recorder*, says: "The grapes were received in good order, and were, to our taste, delicious, having but a slight foxy taste, just enough to suit us. *It is the best white grape we have ever tasted.*—ED. RECORDER."

PROF. GEO. THURBER, of the *American Agriculturist*, says: "We have had an opportunity to test the fruit, and were much pleased with its quality. It is so much better than the Martha that it must entirely supersede that variety; indeed, to those not very critical in their judgment of grapes, *this would rank among the best.*"

M. B. BATEHAM, the well-known horticulturist and editor, says of the Lady: "This white grape has been before the Ohio State Horticultural Society for the past five years, and I have watched the habits of the vine as well as the character of the fruit, for three or four years, and in my opinion, *it is the most promising as to health and value, of all the white grapes that have as yet been grown and tested.*"

From the Twenty-Eighth Annual Report of the Ohio State Board of Agriculture. Page 552.

"Some years since, when I showed a friend of mine, successful results in hybridizing Portulaccas, he at once, and very emphatically, urged me to undertake the production of a grape '*white in color, sweet, thin-skinned, as hardy as the Delaware or Catawba, and then have it ripen early—certainly not later than the middle of August.* If you can produce such a grape, you will not only confer a great favor on your fellow-citizens, but, by properly introducing the vine, you can command your own price, and realize a handsome fortune.' At the State Fair, (Columbus, Sept., 1874,) Mr. Campbell very kindly gave me a bunch of the 'LADY' grape, and, after fully discussing it, *in my estimation, it 'fills the bill,' in every particular* which my friend suggested as important qualities of his imaginary grape.

"J. H. KLIPPART,"

The Hon. ABRAM THOMSON, so long and favorably known to the public in connection with the introduction of the Delaware grape, thus notices the "Lady" in the *Delaware Gazette*: "NEW WHITE GRAPE.—Our horticultural friend, Mr. G. W. Campbell, has favored us with some fine specimens of new white grape, which we think will prove an acquisition, and is destined to become a popular and standard variety. The clusters are of good size and handsomely formed, the berries nearly if not quite as large as those of the Concord, of a beautiful golden hue, and ripen early and uniformly. It is quite sweet, not devoid of sprightliness, has but little pulp, and is remarkably free from that foxiness which is in our estimation so serious an objection to most of the grapes of its class. We repeat, we regard it a decided acquisition, and predict for it a prominent position in the list of hardy market grapes."

MR. SAMUEL MILLER, horticultural editor of the *Rural World*, and originator of the Martha and Eva grapes, after expressing the opinion that the "Lady" grape was superior in quality to either of the above named, says: "The LADY has the right name; *it is a perfect beauty.*"

Much more of similar testimony could be given were it deemed necessary; but it is almost needless to say, no ordinary grape could receive such praise from such men. The accompanying engraving was made from a photograph of a cluster taken from a vine in its second year of bearing. In size of cluster, upon vines of the same age, it has fully equaled the Concord; while in size of the berries it is larger. I have not yet raised any clusters as large as the largest upon old established Concord vines—but I feel confident, that when the vines are fully developed, the Lady will bear clusters equal to the average size of Concorde.

The prices for the season of 1876, will be as follows:

For strong, well-rooted, one year plants, \$1.50 single; \$15 per dozen; \$100 per 100. For two years, selected plants, \$2.00 single; \$20 per dozen; \$150 per 100. Six at dozen rates; twenty-five at 100 rates. At single, or dozen rates, they will be sent, carefully packed, by mail, post-paid, if so requested.

ARNOLD'S CLINTON HYBRIDS.

These grapes were originated by Charles Arnold, of Paris, Ontario, by crossing the foreign varieties upon the Clinton. They are in habit of growth much like the Clinton, and have been found to succeed wherever the Clinton does well.

AUTUCHON.—White; bunch long, rather loose; berry round, medium size; sweet, sprightly, no pulp. Ripens early.

BRANT.—Black; bunch and berry medium; sweet, sprightly. Ripens very early, and keeps well.

CANADA.—Black; fine aromatic flavor; good bunch and berry; good grower, and hardy. Ripens with Concord.

CORNUCOPIA.—Black; bunch medium large, compact; berry medium, sweet and juicy, with very little pulp. Ripens with Concord.

OTHELLO.—Black; bunch and berry large, with fine bloom; rich, sweet and sprightly. Ripens with Delaware.

Prices of the Arnold's Hybrids, 40 cents single; \$3 a dozen; \$20 per hundred.

ADIRONDAC.—Black; bunch and berry large, compact; flavor and quality very good. Ripens early. Not quite hardy. Price, 40 cents single; \$3 doz.; \$20 per 100.

ALLEN'S WHITE HYBRID.—A strong grower, tolerably hardy and productive. Bunches large and compact, berries medium to large; skin thin, semi-transparent; color nearly white, tinged with amber; flesh tender and delicate; quality best; ripens early. Price, 40 cents single; \$3 per dozen; \$20 per 100.

ALVEY.—A vigorous, healthy vine, with fruit of the character of Lenoir and Lincoln, but rather larger berries, and ripens earlier than either; about with Concord. A fine bearer, of fine quality; one of the most desirable of this class of grapes, both for wine and table. Colors some time before fully ripe. Price, 40 cents single; \$3 per dozen.

BELVIDERE.—A very early black grape, large in bunch and berry; of vigorous growth, hardy and healthy, and very productive; somewhat like Christine or Telegraph, but much larger and finer in appearance. Will probably be a valuable market variety, on account of extreme earliness, large size and fine appearance. Earlier than Hartford Prolific, and of rather better quality, as grown here. Price, 50 cents single; \$4 per dozen; \$25 per 100.

BLACK HAWK.—Black; Concord Seedling; healthy, but smaller in bunch and berry; like Concord, but earlier. Price, 40 cents single; \$3 doz.; \$20 per 100.

EUMELAN.

AGAWAM.

Roger's Hybrid No. 15.

BLACK EAGLE.—One of Mr. Underhill's Hybrids; a large, handsome and productive black grape, of very superior quality. A good grower, and very promising. Price, \$1 each; \$9 per dozen.

■ ROTON.—Hybrid cross between Delaware and Chasselas de Fontainebleau, originated by S. W. Underhill. Bunch often 8 to 9 inches long; moderately compact and shouldered; berry medium to large; flesh tender and melting; quality best with much the character of the Chasselas. Ripens early, with the Delaware. The vine is of good, healthy growth. A most desirable variety for amateur and garden culture, and said to be valuable in some localities for vineyards. A grape of admirable quality and great beauty, and very productive. Price, 50 cents single; \$4 per doz.; \$30 per 100.

CONCORD CHASSELAS.—Concord Hybrid, grown from seed of Concord.—White; bunch large, shouldered, compact; skin thin, semi-transparent; seeds small; flesh tender and melting; flavor sweet and rich, like Golden Chasselas; strong grower, with healthy foliage. Ripens with Concord. Price, 75 cents single; \$6 per doz.; \$40 per 100.

CONCORD MUSCAT.—Concord Hybrid, from Concord seed.—White; bunch long; berries large, oval; skin thin; seeds small; color light green, with white bloom; flesh tender; flavor rich, sugary, with distinct Muscat flavor; strong grower, with large foliage. A fine amateur grape. Ripens about with Concord. Price, 75 cents single; \$6 per doz.; \$40 per 100.

CONCORD.—Bunches large, berries round, black, covered with bluish bloom; flesh soft, slightly pulpy; flavor sweet and sprightly. Good, but not first-rate. Produces a fair, red wine. Especially prized for healthiness, hardiness, great productiveness, and general adaptability to nearly all soils and locations. Universally regarded as the best black grape for general cultivation. Price, 10 cents single; \$1 per doz.; \$6 per 100; \$25 to \$30 per 1000. Two years, 15 cents single; \$1.50 per doz.; \$8 per hundred; \$50 per 1000.

CLINTON.—Black; bunch and berry medium; juicy, brisk, sub-acid; prized more for wine than table use. Price, 15 cents single; \$1.50 doz.; \$8 per 100.

CATAWBA.—Red; bunch and berry large; one of the most popular grapes, where it will ripen; late. Price, 25 cents single; \$2 doz.; \$12 per 100, for two years vines.

CREVELING.—Black; bunches long, loose; berries large; flesh tender; flavor delicate, sweet and good. Ripens early. Price, 30 cents single; \$2.50 per doz.; \$15 per 100.

DELAWARE.—This variety must still be accorded the highest place among American grapes, for hardiness, productiveness, and unsurpassed flavor and quality.

In bunch and berry it is, under good cultivation, of full medium size, the clusters usually shouldered, compact and heavy; skin very thin, but tenacious; pulp tender and melting; juice abundant, rich, vinous, sugary, sprightly and refreshing in a remarkable degree; color a beautiful, purplish maroon or wine color when fully ripe, and the berries covered with a thin, whitish bloom.

To produce its best results, the Delaware requires a rich soil, and good cultivation. It seems more free from rot than any other variety in cultivation; and if not permitted to overbear, is among the most reliable grapes for a certain and profitable crop. Price, 25 cents single; \$2 per doz.; \$12 per 100; \$100 per 1000.

DRACUT AMBER.—An early, hardy and healthy red grape; foxy. Price, 40 cts. each; \$3 per dozen.

DIANA.—Red; bunch and berry medium large; sweet and high-flavored; medium early; good. Price, 25 cents single; \$2.50 doz.; \$15 per 100.

DIANA HAMBURGH.—Red; bunch and berry large; moderately compact, shouldered; flesh tender; sweet and rich. A good amateur grape. Medium early. Price, 40 cents single; \$3 doz.

ELSINBURGH.—Black; bunch medium; berry small; good grower; quality fine. Price, 40 cents single; \$3 doz.

EUMELAN.—Black; bunch and berry medium; juicy, spightly and good. Ripens early. Price, 40 cents single; \$3 doz.; \$20 per 100.

EVA.—A fine, white grape of Concord parentage, originated by S. Miller, with the Martha and Black Hawk. While young, the original seedling seemed unproductive, and was therefore neglected. Vines propagated from the original, do not possess this defect, and it is now regarded as a promising and valuable grape. The vine is vigorous, healthy and hardy, and purely of the Concord type. The fruit somewhat like Martha, but higher flavored and less foxy, ripening a few days later. It seems as productive as Martha, and a rather stronger grower; well worthy of attention, and doubtless a valuable acquisition to the list of hardy, healthy and reliable grapes. Price, \$1 single; \$9 per doz. A few extra, or two years, \$1.50 each.

ELVIRA.—A new white grape, originated in Missouri by J. Rommel, and deemed specially promising as a white wine grape. A strong, healthy grower and very productive. An improvement upon the Taylor. Price, \$1.25 single; \$12 doz.

HARTFORD PROLIFIC.—Black; bunch and berry medium large; early, hardy, healthy and productive; quality second or third rate. Price, 20 cents single; \$2 doz.; \$8 per 100.

IONA.—Red; bunch large, long, shouldered; berries medium large; flesh tender; flavor rich, sweet and vinous; quality best. Ripens medium late. Tender in severe winters. Price, 20 cents single; \$2 doz; \$10 per 100.

ISRAELLA.—Black; bunch and berry large, compact and handsome; quality good. Early. Price, 40 cents single; \$3 doz.

IVES.—Black; bunch and berry large, compact, shouldered; sweet, juicy and vinous, but rather hard pulp. Early, and esteemed for red wine. Vigorous, healthy and hardy. Price, 15 cents single; \$1.50 doz.; \$8 per 100.

JANESVILLE.—Black; bunch and berry medium; vine hardy, healthy and productive; second quality. Ripens very early. Price, 40 cents single; \$3 doz.

LADY.—White; new, early, extra. See special description and prices.

LENOIR.—A southern grape of fine quality. Bunch medium, compact; berries round, small; color dark bluish purple, covered with light bloom; flesh tender; flavor rich, sweet and vinous. Ripens earlier than the Isabella; and in favorable localities, will be found desirable for wine and table. A fine grower and tolerably hardy. Price, 50 cents single; \$4 per dozen.

MARTHA.—White; bunch and berry medium, shouldered, compact; pulp tender; sweet, rich, juicy, slightly vinous; quality good—better than Concord. Vine hardy, healthy and productive. Ripens with Concord, or a little earlier. Price, 40 cents single; \$3 doz.; \$20 per 100.

MAXATAWNEY.—White; bunch and berry large; vine vigorous; foliage good; a fine, medium early grape; very good and productive. Price, 40 cts. single; \$3 per doz.; \$20 per 100.

NORTON'S VIRGINIA.—Black; bunches long, large; berries small. One of the best red wine grapes. Price, 40 cents single; \$3 doz.; \$20 per 100.

REBECCA.—A handsome white grape, of excellent quality; bunch and berry, medium to large; vine a moderate grower and productive. A good garden grape, highly esteemed in many places. Price, 40 cents single; \$3 per dozen.

ROGERS' HYBRIDS.

No. 1.—**GÆTHER.**—Light red; bunch and berry very large, oval. Late. Fine for table and wine.

No. 2.—Black; bunch and berry very large; productive. Second quality.

No. 3.—**MASSASOIT.**—Red; bunch and berry large. Early and fine. One of the best.

No. 4.—**WILDER.**—Black; bunch and berry very large; resembling Black Hamburg. One of the most popular.

No. 5.—Red; bunch medium; berry large; flesh tender; flavor sweet and rich; vine hardy. Ripens early. One of the most desirable of the hybrids.

No. 9.—**LINDLEY.**—Red; bunch and berry large; flesh tender, flavor sweet, rich and good. Vine strong grower, healthy and productive. One of the best. Ripens early.

No. 15.—**AGAWAM.**—Red; bunch and berry very large; flavor sweet, rich, and of peculiar, aromatic flavor. Vine vigorous and productive, and one of the most popular of the hybrids. Early.

No. 19.—**MERRIMACK.**—Black; bunch and berry very large. Medium early. In quality and flavor very much like Wilder. Vigorous and productive.

No. 28.—Red; bunch and berry large. Ripens early, and considered one of the best.

No. 30.—Light red; bunch and berry large; flavor very fine, much like the foreign Chasselas. Pulp very tender. Vine vigorous and healthy. One of the best, if not the best, of all the Rogers' grapes. Ripens early.

No. 33.—Black; bunch and berry very large; flavor sweet, rich and sprightly; strong grower and productive.

SALEM.—Red; bunch and berry large; skin thin; sweet, juicy and sprightly; slightly aromatic. One of the best of the Rogers' Hybrids.

Prices of all Rogers' Hybrids, 40 cents single; \$3 doz.; \$20 per 100.

SENASQUA.—Black; bunch large, compact; berry large, round; flesh tender; flavor rich and sprightly. A fine grape. medium early. Good grower. Price, 50 cents single; \$4 doz.; \$25 per 100.

SHAKER, or UNION VILLAGE.—Black; bunch and berry of largest size; strong grower, and very productive. In quality much like Isabella. Price, 40 cents single; \$3 doz.; \$20 per 100.

TELEGRAPH.—Black; bunch and berry medium large; very little pulp; productive and healthy. Ripens nearly as early as Hartford, and of better quality. Price, 30 cents single; \$2.50 doz.; \$15 per 100.

WORDEN'S SEEDLING.—A new black grape, of the Concord character, large in bunch and berry, and very handsome. In quality distinct from Concord and by some regarded better. It ripens early, about with Hartford Prolific; and is a much better grape. Vine vigorous, healthy and hardy. A valuable early variety. Price, 50 cents single; \$5 per doz.; \$30 per 100.

WALTER.—Red; bunch and berry medium; quite compact; productive; juicy, rich and very fine. Ripens early. Price, 75 cents single; \$6 per doz.

WEEHAWKEN.—White; bunch and berry medium; good grower. Early. Quality fine. Price, 40 cents single; \$3 doz.

WHITE DELAWARE.—White, or light green; bunch and berry small, very compact; quality fine; strong grower; moderately productive. Ripens early. Price, \$1 each; \$9 doz.

The above prices are for first-class, one year, healthy and well-rooted vines.

WEIGELA ROSEA. Elegant, hardy, flowering shrub,	25	2 00
<i>Lutea, small, pure yellow flowers,</i>	25	2 00

THE OHIO BEAUTY POTATO.

The Ohio Beauty Potato has now been grown and tested for eight years, and has proven remarkably vigorous, healthy and productive; taking a place with the best varieties known, either new or old. I have received voluntary testimonials, from all parts of the country, attesting its great superiority. The past season has been in this locality an unfavorable one for the growth of good potatoes; being one of alternate drouth and excessive rain, especially in the latter portion, when late potatoes were making their growth and maturing. As a consequence, the Ohio Beauty, in common with Peach-blows and other late varieties, has shown an unusual tendency to hollowness at the center in the larger specimens. While it detracts from the value of the potato for this season, I regard it only as an accidental imperfection, and not as a constitutional and permanent defect, as it has hitherto been quite free from this trouble. In quality it is among the very best, and for size and health and great productiveness not excelled by any variety I have grown. As a fine, late keeper, I think it has no superior, and it will doubtless take and sustain a high place among standard varieties for family use and market. For the coming season, the prices will be, for those who wish to try it in small quantities \$1, for 3 pounds, postage paid by mail, to any post-office address in the Union. Five pounds will be sent for \$1, to any express station of the American Un. Express Co. charges paid. One bushel will be sent by freight or express for \$3, or a barrel for \$5, charges paid by purchaser.

Compton's Surprise Potato has proven a very good potato for family use, though not attractive in appearance. I can supply a few barrels of sound potatoes at \$5 per bbl.

Extra-Early Vermont, has also been very fine as an early variety. I do not think it earlier, or more productive than Early Rose, but it has invariably been of better quality, and of more uniform good size, as grown here. Shipped to any address, for \$5 per bbl.

Small quantities of either of the above on same terms as for Ohio Beauty.

CHOICE VEGETABLE SEEDS.

The following seeds are fresh and genuine; and all the kinds offered will be found of high and established reputation. Sent post paid.

	CENTS PER PACKET.
ASPARAGUS. —Conover's Colossal, large and of rapid growth.....	5

TOMATO. —Trophy. Large, smooth, solid and good.....	10
Conqueror. New, early. Smooth and fine quality.....	10
Smooth Red. Extra select. Very fine.....	10

SCALAWAG RECORD.

For some years after I published the doings of the magnificent Remington, who bragged about his wonderful country-seat near Philadelphia, upon which he had expended over \$200,000, but who proved to be entirely above any such low-born weakness as paying his debts, GENTLEMEN of the "Jeremy Diddler" class gave me a wide berth.

I am sorry to say there are still some ungodly wretches who have no fear before their eyes, and who are so lost to all the instincts of decent humanity, that they do not hesitate to take advantage of the trusting confidence of innocent nurserymen, and ruthlessly appropriate their property without rendering a constitutional equivalent.

The only excuses I shall make for noticing a few of these gentlemen of the genus "scalawag"—I am not sure it should not be "SCALY-wag"—are: first, that it relieves my mind;—second, it puts my brother nurserymen upon their guard against their insidious wiles; and thirdly, I regard it as a kind of retributive justice, due to the "scaly" craft themselves.

I do not propose to give a full list of these worthies; only a few "specimen bricks," which may serve as awful examples to those who may be inclined to follow in their disreputable footsteps.

The first in order, and who perhaps is worthy of heading the list, is Dr. C. H. Grand—and a GRAND SCAMP he is, whatever part of creation he now infests—who formerly hailed from Andover, Ills. He first made an order for some \$30 worth of vines, C. O. D., which was promptly paid. He was so well pleased with his first order that he soon made a much larger one, of about \$100, but would like 60 days' time for delivery and collection, and enclosed a recommendation, written and signed by the Postmaster, endowing the Dr. with every Christian virtue, representing him as honorable and upright in his dealings with all men. The Dr. signed his letter, "yours fraternally," and everything seemed so lovely, I sent the vines, taking the Dr.'s note at 60 days, payable at Bank. At maturity the note was returned, unpaid. Letters of inquiry to the Dr. were treated with ominous silence. After ineffectual attempts to collect, the following state of things was developed. The P. M. who had recommended the Dr. was of the Nasby stripe, and had been wheedled into copying and signing a recommendation WRITTEN BY THE DR. HIMSELF! Some time after, I wrote to a gentleman in that neighborhood, making inquiry as to the Dr.'s status, and received the following:

"Dr. C. H. Grand ran away a year ago. He is not worth a cent. That little property where he lived belonged to his now divorced wife. He spent \$10,000 of hers, and she is in destitute circumstances."

What a lovely picture! and what an accommodating postmaster!

Another individual, Henry Plessner, who formerly lived at Toledo, but of whose whereabouts I am not at present advised, victimized me to the amount of \$106. He was a PATRIOTIC gentleman, and I believe, by some means received the appointment of Major, in the O. V. I. during the war. He was evidently properly appreciated in this position, for he was dismissed the service for "conduct unbecoming an officer and a gentleman." I afterward heard of him at Saginaw, Mich., and in reply to my affectionate inquiries for his welfare, only got the response that he was "no good."

Sam. A. Baker, of Madison, Tenn., together with "A. & S. L. Baker," his indorsers, are a community which it will be eminently safe not to have any business transactions with, on any but a cash-in-advance basis. The aforesaid Sam. imperturbed me for credit for \$103, and offered a note payable at Bank, with A. & S. L. Baker as his indorsers. As I did not know the parties, I made inquiry of the Cashier of the Bank, if such a note, so indorsed would be good, and received reply, "yes, they are considered good." The vines were sent, and the note taken; but when it was due, came back protested and unpaid. The lovely Sam. deigned no explanation; but I found upon inquiry from a collection agent, that he was a drunken and impetuous scalawag, and that S. & A. L. Baker were his wife and father. They were profuse in promises to pay, none of which were kept. What property they had was in the hands of the wife, and they were abundantly able to pay. Finally, the note was sued—and then appeared the "true inwardness" of the transaction. According to the laws of Tennessee, a married woman's indorsement of a note is of no account, and carries with it no obligation to pay; and as the wife was the only one of the charming crowd who had property which could be reached, the game was up, and I was again successfully swindled.

There are a "few more of the same sort," whose cases may hereafter receive respectful consideration; some petty scamps, also, who get a few dollars' worth upon promise of "remitting immediately on receipt of goods," but who never deign to take any notice of the matter afterwards. Statements of account, or requests for payment are treated with contemptuous silence; but they may get "waked up" hereafter. I will give them another year of grace.

As a rule, I do not believe any man has a better, or more honorable list of customers, than I have, in every state in the Union; but I wish it understood that I desire no business relations with any others. And if the scalawags and scamps do succeed in imposing upon me occasionally, I mean at least to have the satisfaction of showing them up.

FLOWER SEEDS.

	PACKET.
ASTERS, finest French and German fancy hybrids, mixed colors,	10 cents.
ANTIRRHINUM, SNAPDRAGON, fine mixed, variegated and fancy,	10 "
